EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. The issues below were pointed out in the non-final office action, but were not addressed by the Applicant.

The application has been amended as follows:

Referring to the preliminary amendment to the specification filed on 06/23/05:

Regarding the paragraph inserted on page 1 immediately after the title:

In line 5, "PCT/EP2003/01338" was replaced with --PCT/EP2003/013387--.

Regarding the two new paragraphs inserted on page 52 after line 2:

In line 3, "PCT/EP2003/013388" was replaced with --PCT/EP2003/013387--.

Drawings

The drawings were received on 02/19/08. These drawings are acceptable.

Allowable Subject Matter

Claims 44-85 are allowed.

The following is an examiner's statement of reasons for allowance:

de Waard et al. US 6,373,033 (col. 10 lines 8-38, Fig. 5) discloses a method for determining at least one state variable from a model of an RTP system by means of at least one test signal picked off from the RTP system (i.e., the measured quantity), which varies with the state variable to be determined, and a measured quantity predicted using the model (i.e., the predicted value).

Similar methods are shown in Stoddard et al. US 5,895,596 (col. 12 line 59 – col. 13 line 5) and Kee et al. US 5,583,780 (col. 12 line 19 – col. 14 line 3).

However, the prior art of record fails to teach or fairly suggest separately establishing at least the changeable portion by a filter to form a first difference between the changeable portion of the measurement value and the changeable portion of the measurement value predicted by the model; adapting at least one model parameter by feeding the first difference back into the model with the aim of adapting the model behavior to variable system parameters; forming a second difference from the measurement value and the predicted value, or from the measurement value corrected by the changeable portion and the predicted value corrected by the changeable portion; and correcting a condition of the model system by feeding the second difference back into the

Art Unit: 2121

model with the aim of bringing the condition of the model system into correspondence with that of the real system, in combination with the remaining features and elements of the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
